Portfolio | GitHub | LinkedIn

SUMMARY

B.Tech CSE student who learns by building across frontend, backend, databases, authentication and real-time systems. Experienced with React, Next.js, Node.js and PostgreSQL, with hands-on AI/ML work in deepfake detection. Seeking a software engineering internship in 2026 to apply my skills, gain industry experience and grow as a developer.

TECHNICAL SKILLS

Languages	JavaScript, Python, HTML, CSS
Frontend	React.js, Next.js, Bootstrap
Backend & Databases	Node.js, Express.js, REST APIs, Socket.IO, PostgreSQL, MongoDB, Supabase
Tools & Platforms	Git, GitHub, Docker, VS Code, Linux
Concepts	JWT Authentication, Row Level Security, CRUD, Real-time Sync, Basic Networking

PROJECTS

CodeLab – Collaborative Coding Platform

[GitHub](#)

React, Node.js, Socket.IO, Monaco Editor, PostgreSQL, JWT

- Built a browser-based platform with shared coding rooms and real-time code synchronization for pair programming.
- Implemented JWT authentication and account attribution, and integrated Monaco Editor for an IDE-like experience.
- Developed live chat and synchronized editor state across users in the same room.

Gym Enquiry Portal

[GitHub](#)

Next.js, Supabase, PostgreSQL, Row Level Security

- Created a reusable enquiry and membership management platform for gyms with a responsive public site.
- Built protected admin routes and CRUD workflows for membership plans and enquiries.
- Secured records using PostgreSQL Row Level Security.

TextUtils – React Web App

[Details](#)

React, JavaScript, Bootstrap

- Built a responsive text utility app with formatting, word and character count, reading time, copy actions and dark mode.

LIVE-INFO – News Web App

React, JavaScript, REST API

- Built a news application that fetches and displays articles by category through a REST API, updating content dynamically.

AI Deepfake Detector – Machine Learning Project

Python, CNN, Computer Vision

- Developed a CNN-based model to classify images as real or deepfake using image preprocessing and deep learning.

Linux Firewall Configuration

Linux, Networking

- Configured firewall rules to control incoming and outgoing network traffic, applying Linux administration and network security basics.

EDUCATION

Bachelor of Technology – Computer Science and Engineering

2023 – Present

Kshatriya College of Engineering, Chepur, Armoor | CGPA: 83% (8.3/10)

Intermediate – MPC

2021 – 2023

Kshatriya Junior College | GPA: 98.5%

CERTIFICATIONS

- Tech Explorer Job Simulation – Certificate of Completion (August 2026): tasks in Software Engineering, Technical Analysis, Cybersecurity and Data Science.
- IBM SkillsBuild – AI Fundamentals Certificate
